Volunteers needed for COVID-19 breath study

If you test **POSITIVE**, we want your breath!

We are designing a breathalyzer for SARS-CoV-2

**Why?**

Check out the preliminary data!

**Who:** Persons with no symptoms who recently (< 5 days) tested positive for COVID-19

**What:** Donate a breath sample by blowing into a bag

The purpose of this study is to find out if chemicals in breath can detect COVID-19 faster and as accurately as a nasal swab test, even if people don’t have symptoms. We plan to use the results to build a breathalyzer for COVID-19.

**What would happen if you decided to participate?**
- You will need to sign a consent form (electronically).
- You will need to donate a breath sample. We will come to you to collect the sample.
- You will receive a $10 gift card for participating.
- You will not receive any additional services from IU Health or the researchers for being in the study.

**Who is eligible?**
- COVID-19 test result (positive or negative) within the last five days with or without symptoms.
- Persons comfortable breathing into a breath bag.

**What if you do not want to participate?**
- You have a right to say “no.”
- If you choose not to participate, your decision will not affect your healthcare or your benefits.
- If you join the study, you can change your mind and stop or choose to leave the study at any time.

If you want to join the study, or learn more about it email, text, or call us!
